

Integrate with Confidence

THE FUTURE OF FACILITY AUTOMATION STARTS HERE

Carolina Handling has the automation expertise, technologies and proven processes to turn your facility into an efficient, productive, ROI-driving machine. We partner with industry-leading organizations to bring you cutting-edge solutions.

LOCUS

- Easy-to-use Autonomous Mobile Robots (AMRs)
- Excel in dynamic and congested environments
- Available for state-of-the-art shuttle systems, picking systems, moving systems and sorting systems

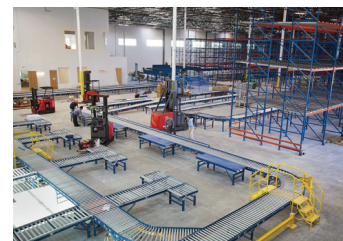

DESTUFF-IT™

- Aid workers who load and unload product in containers and trailers.
- More throughput and greater handling capacity with less fatigue and muscle strain because of optimal positioning to the box wall.

K.HARTWALL LIFTLINER®

- Carry multiple loads and load/unload from both sides.
- Excellent maneuverability, ergonomic design and easy to use, reducing product and packaging damage in your warehouse.

CONVEYOR & SORTATION

- An efficient way to move products and pallets through your facility.
- Highly flexible and extremely accurate, automation solutions like sortation systems can also reduce labor costs by 50-70%.

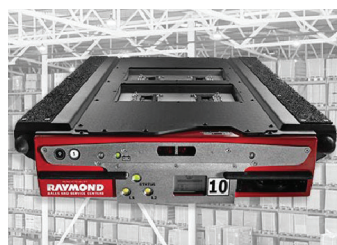

MODULA

- Advanced automated storage and retrieval system.
- Maximizes your floor space, allowing you to boost productivity and accuracy, reduce storage space and enhance worker safety.

AUTOMATED GUIDED VEHICLES

- Efficiently manage repetitive horizontal transport and cart-towing tasks with Raymond's Automated Guided Vehicles.
- Versatile, flexible, productive and scalable, AGVs are built to perform.

RADIOSHUTTLE™

- Semi-automated, high-density storage system.
- Maximize your warehouse space, maintain selectivity between all levels and increase your operational efficiency.

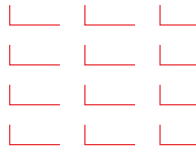

INDUSTRIAL ROBOTICS

- Accurately and quickly perform repetitive actions throughout your entire operation.
- Robotic systems can be repurposed.
- Automated pallet building reduces worker strain and frees operators for other tasks.

A ONE-STOP SHOP TO DRIVE BUSINESSES FORWARD

NEW & USED LIFT TRUCKS

The exclusive Raymond Sales and Service Center in the Southeast

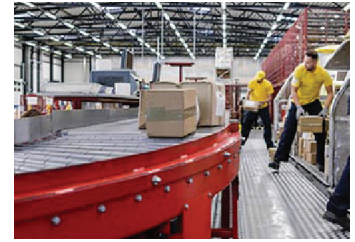

FLEET SERVICE

Custom service solutions that ensure your fleet is reliable, productive and cost-effective

FLEET OPTIMIZATION

Increased visibility and meaningful data to help improve your people, processes and operations with iWarehouse®

FACILITY AUTOMATION

Flexible, scalable, efficient solutions you can integrate with confidence

TRAINING

Everything from OSHA compliance to full technical, service and maintenance training

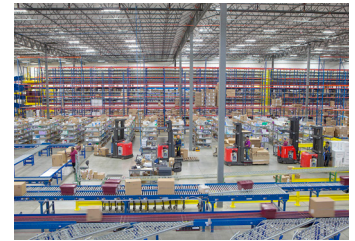

EQUIPMENT & SUPPLIES

Dock and door, forklift batteries and parts, racking, mezzanines, floor scrubbers and more

CONSULTING & ENGINEERING

Scalable technologies and innovative software that allow you to integrate, automate, manage and optimize your processes

LEAN MANAGEMENT

Improved workflows that save time and money by identifying inefficiencies and implementing changes
