

**YOUR PARTNER FOR POWER SYSTEMS**

**It's a tough enough job to manage your operation without having to worry if your lift truck batteries are being properly charged, maintained, and watered with regularity. Having been in the business of providing expert equipment service and consultation for over 50 years, we know what it takes to manage not just lift trucks and pallet jacks, but the batteries and chargers that keep them moving.**

**MOTIVE POWER PROGRAMS:  
ONE FOR EVERY OPERATION**

We've designed an innovative and intelligent approach to motive power management with our Power Up Programs. Three tiers are available (Scheduled, Standard, and Comprehensive) and can be tailored to complement or replace maintenance performed by your own personnel.

As a service partner for hundreds of companies in dozens of different industries, we understand that no two businesses operate the same way. Determining the right power maintenance program for your operation and budget begins with our team conducting a complete power assessment. Using this data, we'll make recommendations based on several key factors, including: the age and condition of your current equipment, the number of shifts run per day, and your need for additional features like remote monitoring and data collection.

** A PROGRAM FOR EVERY NEED**

Each of our Power Up Programs has been designed to ensure battery integrity and reliability while reducing your total cost of ownership. So, whether you have a few electric pallet jacks or an entire fleet of reach trucks and orderpickers, we'll help you determine the right fit for your operation.

**Scheduled Power Management**

Scheduled Power Management provides foundational battery maintenance, watering, equalizing and insights into improved power utilization.

**Standard Power Management**

All the features of our Scheduled program, plus incidental costs including breakdowns, parts, freight, bad cells and misuse to reduce downtime and related expenses.

**Comprehensive Power Management**

All the features of our Scheduled and Standard programs with an included battery and charger, plus automated data collection, hardware, reporting and ongoing consultation, all as a monthly service.

	Scheduled	Standard	Comprehensive
Scheduled Battery Care including Watering, Equalizing, and Initial Power Consultation	●	●	●
Incidental Costs including Breakdown, Parts, Freight, and Cells	■	●	●
Automated Data Collection, Hardware, Reporting, and On-Going Consultation	○	○	●
Battery and Charger	○	○	●
